# Zora Smith

Seattle, WA | Zora.Smith@gmail.com | github.com/ZoraS123 | linkedin.com/in/zora-smith-b1580a146/

## PROFESSIONAL SUMMARY

Computer science graduate student (GPA 3.85) with C++, SQL, relational database design, requirements analysis, and user-centered application development experience. Respiratory therapist experienced in troubleshooting computerized systems and interpreting real-time data in safety-critical settings.

## EDUCATION

University of Michigan-Flint — MS, Computer Science; Software Engineering & Cloud Computing; Expected August 2027; GPA 3.85/4.00
Eastern Michigan University — BS, Health Science
Kalamazoo Valley Community College — AAS, Respiratory Care

## TECHNICAL SKILLS

C++, Swift, SwiftUI, SwiftData, SQL, Git, GitHub, Xcode, Figma, relational database design, ER modeling, object-oriented programming, requirements analysis, testing, prototyping

## PROJECTS

### Hangman Game — C++

Three-person team project. Developed gameplay loop, input validation, duplicate-guess handling, wrong-guess tracking, word-state updates, win/loss detection and replay.

### Concert Ticket Database System — SQL / ER Modeling

Collaborated on concert/ticket relational database. Developed ER model, relational schema, SQL DDL, queries, and technical documentation.

### SpinSpotter — Figma / HCI

Collaborated on media-bias detection application prototype; conducted surveys and interviews, developed user flows and prototypes, and contributed to heuristic evaluation and usability testing.

## EXPERIENCE

### Seattle Children's Hospital — Respiratory Therapist | Seattle, WA

Monitor and troubleshoot computerized medical equipment; interpret diagnostic results and real-time data; collaborate with clinical teams and document outcomes.

### Ann Arbor VA Health System — Respiratory Therapist | Ann Arbor, MI

Operated and troubleshot complex respiratory systems; interpreted diagnostic information; documented interventions and collaborated in regulated clinical environments.
